EKATERINA DEYS

Senior Technical Product Manager | Payments, Pricing & Monetization Platforms

Kazakhstan · Available from November 2026 · Open to relocation (Amsterdam) · katedeys@gmail.com · linkedin.com/in/kate-deys

PROFESSIONAL SUMMARY

Senior technical product manager with 10+ years in tech (7+ in product) across fintech, payments and platform products. Turns commercial and financial intent into platform capabilities with explicit rules and data models: pricing models, balance and repayment logic, cost-based routing, reconciliation. Launched two monetization models (pay-per-action pricing, paid subscriptions) and built money-movement platforms used by other teams: payment orchestration across 40 countries and the payments platform behind credit products. Productizes recurring patterns instead of one-off builds, cutting partner onboarding to 2.5 weeks. Ties each mechanic to a measurable money outcome (processing cost, conversion to paid, adoption) and works with engineering on APIs, data models and pipeline trade-offs without writing production code. Partners with Finance, Compliance, Security and external providers.

SELECTED IMPACT

- Cut payment-processing costs by ~$100K/month (~20%) at inDrive with cost-based routing rules: provider cost, limits, coverage and amount.
- Designed and launched a CPA (pay-per-action) pricing model at Drom.ru, adopted by 90% of wholesale sellers.
- Turned recurring partner integrations into one standard contract and flow across 4+ PSP, EMI and acquiring partners, turning unpredictable integration timelines into a steady 2.5 weeks.
- Launched a paid analytics subscription at Sbermarket: 3 of 5 pilot retailers converted to paid.
- Cut financial-report preparation for top-40 retailers from one day to 1.5 hours with reconciliation and reporting products.

PROFESSIONAL EXPERIENCE

Lead Technical Product Manager — Payments Platform Oct 2025 – Oct 2026

SkyRo · Malaysia (remote, lending fintech) · contract

- Owned product direction for the payments platform behind credit products (disbursements, repayments, wallet operations), used by lending and origination teams.
- Defined the credit-line money model between BFF and Credit Engine: drawdowns, repayments, outstanding balance and minimum payment as explicit rules and data contracts, refreshed on every balance-changing event.
- Designed the full-payoff calculation flow: asynchronous calculation, customer confirmation, invalidation and recalculation before execution, so the amount charged always matches the amount owed.
- Launched multi-channel repayments in Malaysia with 2 partners and 3 methods each (cards via PSPs, bank transfers via Virtual IBANs, cash) and defined the payment event model feeding the Credit Engine; 100% of bank-transfer repayments reconcile automatically.
- Designed disbursement flows with idempotency, retries and reconciliation so that no money movement is duplicated or lost and every outcome is auditable, which removed manual payout investigations entirely.
- Defined integration contracts with PSPs and banks: request/response schemas, transaction identifiers, status transitions, error mapping and validation rules.
- Defined monitoring and alerting requirements for the credit payouts rollout and supported its operational launch.

Technical Product Manager — Payments Jan 2023 – Sep 2025

inDrive · Astana, Kazakhstan

- Built the payment orchestration platform end to end, from discovery and solution design through partner integrations, pilot and rollout, scaling from 4 to 40+ countries.
- Designed routing rules driven by processing cost, provider limits, transaction amount and geographic coverage, saving ~$100K/month (~20%).
- Defined one internal transaction state model and unified status and error mapping across providers, giving finance and support consistent, auditable outcomes.
- Designed failover logic based on soft/hard decline classification, defining retry eligibility and alternative routing paths.

- Designed provider health management with automatic exclusion and gradual traffic restoration, reaching a 96.4% SLA.
- Led PCI DSS Service Provider certification, coordinating Product, Engineering, Security and Compliance.
- Managed external PSP relationships across integrations, incidents and performance reviews; grew transaction volume by 1.5% through flow optimization.

Lead Product Manager May 2022 – Jan 2023

Tinkoff Bank · Russia

- Automated merchant onboarding, cutting it from 1 month to 2 weeks and reducing support volume by 23%; introduced an OKR-based discovery-to-delivery model and hired 3 PMs after 40+ interviews and ran a junior-to-middle mentoring programme.

Lead / Senior Product Manager Jun 2020 – May 2022

Sbermarket · Russia (grocery e-commerce)

- Built financial reconciliation and reporting products for the top 40 retail partners, cutting report preparation from one day to 1.5 hours.
- Launched a paid SMB analytics subscription MVP: piloted with 5 retailers, 3 converted to paid; reduced retailer churn by 15%.

Product Manager Jan 2019 – Jun 2020

Drom.ru · Russia (automotive marketplace)

- Designed and launched a CPA monetization model (sellers pay per buyer action), adopted by 90% of wholesale sellers; reduced listing errors from 20% to 4% through automation.

Project Manager 2015 – 2018

Interfaced

SKILLS

Pricing & monetization: pricing model design and launch (pay-per-action, subscriptions) · cost-based rules · cost and adoption metrics · balances, drawdowns & repayments · amount calculation and revalidation rules

Billing-grade platform design: data models & state machines · API contracts · event models · idempotency · reconciliation & auditability · error mapping · async pipelines · monitoring

Stakeholders: Finance · Compliance · Security · Engineering · external PSPs, EMIs & banks · written specs in remote teams

Tools: SQL · Grafana · Amplitude · Mixpanel

EDUCATION & LANGUAGES

Tomsk State University — Applied Mathematics and Cybernetics, 2014

Russian — Native · English — C1
