EKATERINA DEYS

Product Manager | Operations Platforms, Automation & Fintech

Kazakhstan · Available from November 2026 · Remote · Open to relocation · katedeys@gmail.com · linkedin.com/in/kate-deys

PROFESSIONAL SUMMARY

Product manager with 10+ years in tech (7+ in product) who removes manual work from fintech operations. At Tinkoff I automated merchant onboarding, cutting it from one month to two weeks and support volume by 23%. At a lending fintech in Southeast Asia I built asynchronous disbursements that removed manual payout investigations entirely and Virtual IBANs that reconcile 100% of bank-transfer repayments automatically. At Sbermarket I cut retailers\x27 financial reporting from a day to 1.5 hours. I map the process first, find where people wait or re-check, then design the workflow, rules and metrics with Engineering, Operations, Compliance and Antifraud. Comfortable with SQL and dashboards for queues, processing times and statuses. KYC/AML and antifraud integrations, PCI DSS. Remote, available from November 2026.

SELECTED IMPACT

- Automated merchant onboarding at Tinkoff: from one month to two weeks, support volume –23%.
- Removed manual payout investigations entirely with asynchronous disbursements (callbacks, status checks, idempotency, reconciliation).
- Virtual IBANs that reconcile 100% of bank-transfer repayments automatically; repayments launched with 2 partners and 3 methods each.
- Cut retailers' financial-report preparation at Sbermarket from one day to 1.5 hours.
- Turned unpredictable partner integrations into a steady 2.5 weeks with one standard contract and onboarding flow.

PROFESSIONAL EXPERIENCE

Lead Technical Product Manager — Payments Platform

Oct 2025 – Oct 2026

Lending fintech, Southeast Asia (NDA) · Malaysia (remote) · contract

- Owned product direction for the payments platform behind credit products (disbursements, repayments, wallet operations, partner integrations), used by lending and origination teams.
- Defined the credit-line money flows between BFF and Credit Engine: drawdowns, repayments, balance and minimum-payment calculation, with cached retrieval and refresh triggered by balance-changing events.
- Designed asynchronous full-payoff calculation with invalidation and revalidation before execution, so customers are charged the exact amount owed at payment time.
- Designed asynchronous disbursement flows with callbacks, status checks, idempotency, retries and reconciliation to prevent duplicate or missed money movements, which removed manual payout investigations entirely.
- Launched multi-channel repayments in Malaysia with 2 partners and 3 methods each (cards via PSPs, bank transfers via Virtual IBANs, cash) and the payment event model feeding the Credit Engine.
- Defined integration contracts with PSPs and banks: request/response schemas, transaction identifiers, status transitions, error mapping and validation rules.
- Designed Virtual IBAN issuance within loan origination, including async callbacks, timeouts, retries and duplicate-account closure; 100% of bank-transfer repayments now reconcile automatically.
- Defined monitoring and alerting requirements for the credit payouts rollout and supported its operational launch.

Technical Product Manager — Payments

Jan 2023 – Sep 2025

inDrive · Astana, Kazakhstan

- Built the payment orchestration platform end to end, from discovery and solution design through partner integrations, pilot and rollout, scaling from 4 to 40+ countries.
- Designed cost-aware routing based on provider priority, amount, limits, geographic coverage and processing cost, saving ~$100K/month (~20%).
- Designed failover logic using soft/hard decline classification, defining retry eligibility and alternative routing paths.
- Defined unified status and error mapping, aligning external provider responses with one internal transaction state model for consistent, auditable outcomes.
- Designed provider health management (backlogs, timeouts, alerts, support signals), automatic exclusion and gradual traffic restoration, reaching a 96.4% SLA.

- Led PCI DSS Service Provider certification, coordinating Product, Engineering, Security and Compliance.
- Optimized payment flows, growing transaction volume by 1.5%; managed PSP relationships across integrations, incidents and performance reviews.

Lead Product Manager May 2022 – Jan 2023
Tinkoff Bank · Russia

- Automated merchant onboarding, cutting it from 1 month to 2 weeks and reducing support volume by 23%.
- Introduced an OKR-based discovery-to-delivery operating model; hired 3 PMs after 40+ interviews and ran a junior-to-middle mentoring programme.

Lead / Senior Product Manager Jun 2020 – May 2022
Sbermarket · Russia

- Built financial reconciliation and reporting products for the top 40 retailers, cutting report preparation from 1 day to 1.5 hours.
- Launched a paid SMB analytics subscription MVP (3 of 5 pilot retailers converted to paid); reduced retailer churn by 15%.

Product Manager Jan 2019 – Jun 2020
Drom.ru · Russia

- Designed and launched a CPA monetization model adopted by 90% of wholesale sellers; reduced listing errors from 20% to 4% through automation.

Project Manager 2015 – 2018
Interfaced

SKILLS

Billing & monetization: pricing model launches (CPA, subscriptions) · balances, drawdowns & repayments · reconciliation · settlements · refunds & reversals · financial reporting · cost to serve

Platform & integration: API contracts · transaction lifecycle & state models · async integrations · callbacks & webhooks · idempotency · retries · error mapping · monitoring & alerting

Payments & compliance: orchestration · routing & failover · PSP/acquirer/EMI/bank integrations · Virtual IBANs · PCI DSS (Service Provider) · KYC/AML

Ways of working: written specs & async decision-making · cross-functional work with Finance, Security & Compliance · AI-assisted analysis and spec writing · SQL · Grafana · Amplitude · Mixpanel

EDUCATION & LANGUAGES

Tomsk State University — Applied Mathematics and Cybernetics, 2014
