EKATERINA DEYS

Payments Product Manager | Payment Success, Routing & Reliability

Kazakhstan · Available from November 2026 · Remote · Open to relocation · katedeys@gmail.com · linkedin.com/in/kate-deys

PROFESSIONAL SUMMARY

Payments product manager with 10+ years in tech (7+ in product) across fintech and platform products, focused on making payments go through: routing, failover, provider health and clear payment status for clients. Built inDrive's payment orchestration across 40 countries, with routing rules driven by cost, limits and coverage (~$100K/month saved), failover on soft/hard decline classification and provider health management that reached a 96.4% SLA. Most recently ran the payments platform for a lending fintech: disbursements, multi-channel repayments, Virtual IBANs and PSP and bank integrations. Works from transaction-level data (SQL, Grafana) to find why payments fail and what to fix first, and works closely with engineering, operations and compliance. Led PCI DSS Service Provider certification. Can relocate to Belgrade; available from November 2026.

SELECTED IMPACT

- Reduced payment-processing costs by ~$100K/month (~20%) through in-house payment routing at inDrive.
- Built a payment orchestration platform from discovery to full launch across 40 countries at inDrive.
- Reached a 96.4% provider SLA through health monitoring, automatic provider exclusion and traffic restoration.
- Standardized integration contracts across 4+ PSP, EMI and acquiring partners at SkyRo, turning unpredictable integration timelines into a steady 2.5 weeks.
- Led PCI DSS Service Provider certification across Product, Engineering, Security and Compliance.

PROFESSIONAL EXPERIENCE

Lead Technical Product Manager — Payments Platform Oct 2025 – Oct 2026

SkyRo · Malaysia (remote) · contract

- Owned product direction for the payments platform behind credit products (disbursements, repayments, wallet operations, partner integrations), used by lending and origination teams.
- Defined the credit-line money flows between BFF and Credit Engine: drawdowns, repayments, balance and minimum-payment calculation, with cached retrieval and refresh triggered by balance-changing events.
- Designed asynchronous full-payoff calculation with invalidation and revalidation before execution, so customers are charged the exact amount owed at payment time.
- Designed asynchronous disbursement flows with callbacks, status checks, idempotency, retries and reconciliation to prevent duplicate or missed money movements, which removed manual payout investigations entirely.
- Launched multi-channel repayments in Malaysia with 2 partners and 3 methods each (cards via PSPs, bank transfers via Virtual IBANs, cash) and the payment event model feeding the Credit Engine.
- Defined integration contracts with PSPs and banks: request/response schemas, transaction identifiers, status transitions, error mapping and validation rules.
- Designed Virtual IBAN issuance within loan origination, including async callbacks, timeouts, retries and duplicate-account closure; 100% of bank-transfer repayments now reconcile automatically.
- Defined monitoring and alerting requirements for the credit payouts rollout and supported its operational launch.

Technical Product Manager — Payments Jan 2023 – Sep 2025

inDrive · Astana, Kazakhstan

- Built the payment orchestration platform end to end, from discovery and solution design through partner integrations, pilot and rollout, scaling from 4 to 40+ countries.
- Designed cost-aware routing based on provider priority, amount, limits, geographic coverage and processing cost, saving ~$100K/month (~20%).
- Designed failover logic using soft/hard decline classification, defining retry eligibility and alternative routing paths.
- Defined unified status and error mapping, aligning external provider responses with one internal transaction state model for consistent, auditable outcomes.
- Designed provider health management (backlogs, timeouts, alerts, support signals), automatic exclusion and gradual traffic restoration, reaching a 96.4% SLA.
- Led PCI DSS Service Provider certification, coordinating Product, Engineering, Security and Compliance.

- Optimized payment flows, growing transaction volume by 1.5%; managed PSP relationships across integrations, incidents and performance reviews.

Lead Product Manager May 2022 – Jan 2023
Tinkoff Bank · Russia

- Automated merchant onboarding, cutting it from 1 month to 2 weeks and reducing support volume by 23%.
- Introduced an OKR-based discovery-to-delivery operating model; hired 3 PMs after 40+ interviews and ran a junior-to-middle mentoring programme.

Lead / Senior Product Manager Jun 2020 – May 2022
Sbermarket · Russia

- Built financial reconciliation and reporting products for the top 40 retailers, cutting report preparation from 1 day to 1.5 hours.
- Launched a paid SMB analytics subscription MVP (3 of 5 pilot retailers converted to paid); reduced retailer churn by 15%.

Product Manager Jan 2019 – Jun 2020
Drom.ru · Russia

- Designed and launched a CPA monetization model adopted by 90% of wholesale sellers; reduced listing errors from 20% to 4% through automation.

Project Manager 2015 – 2018
Interfaced

SKILLS

Payments: orchestration · routing & failover · PSP/acquirer/EMI/bank integrations · cards · payouts · loan repayments · wallets · Virtual IBANs · reconciliation · settlements · refunds & reversals · provider health management

Platform & integration: API contracts · transaction lifecycle & state models · async integrations · callbacks & webhooks · idempotency · retries · error mapping · monitoring & alerting

Compliance & monetization: PCI DSS (Service Provider) · KYC/AML · antifraud integrations · pricing model launches (CPA, subscriptions)

Ways of working: written specs & async decision-making · cross-functional work with Finance, Security & Compliance · AI-assisted analysis and spec writing · SQL · Grafana · Amplitude · Mixpanel

EDUCATION & LANGUAGES

Tomsk State University — Applied Mathematics and Cybernetics, 2014
