EKATERINA DEYS

Technical Product Manager | Payments & Fintech Platforms

Armenia · Remote or relocation · katedeys@gmail.com · linkedin.com/in/kate-deys · katedeys.github.io/katedeys-portfolio

PROFESSIONAL SUMMARY

Payments product manager with 10+ years in tech. I build payment platforms end to end: orchestration across 40+ countries, payouts and repayments, remittances and partner integrations. I work closely with engineering on flows and API contracts and measure success in cost, success rate and partner go-live time. English C1.

SELECTED IMPACT

- **~$100K/month (~20%)** lower processing costs through in-house payment routing · inDrive
- **4 → 40+ countries** on one payment orchestration platform · inDrive
- **96.4%** provider SLA with health monitoring and automatic failover · inDrive
- **+1.5%** transaction volume from payment flow optimisation · inDrive
- **2.5 weeks** steady partner go-live across 4+ PSP, EMI and bank partners · SkyRo
- **100%** of bank-transfer repayments reconciled automatically via Virtual IBANs · SkyRo
- **1 month → 2 weeks** merchant onboarding and **–23%** support volume · Tinkoff
- **~15%** of new merchants brought by an agent channel · Tinkoff
- **1 day → 1.5 hours** report preparation for the top 40 retailers · Sbermarket
- **3 of 5** pilots converted to a paid subscription, **–15%** retailer churn · Sbermarket
- **90%** of wholesale sellers adopted a new CPA model, listing errors **20% → 4%** · Drom.ru

PROFESSIONAL EXPERIENCE

Lead Technical Product Manager — Payments Platform

Oct 2025 – Oct 2026

SkyRo, lending fintech · Malaysia (remote) · contract; part-time Oct 2025 – Jan 2026 alongside inDrive, full-time from Feb 2026

- Owned product direction for the payments platform behind credit products (disbursements, repayments, wallet operations, partner integrations), used by lending and origination teams.
- Took a remittance product from zero to MVP to capture migrant remittances (Gulf → Southeast Asia) into our lending market, then pivoted it into cross-border repayments: relatives abroad top up a family member's credit line at home. Ran partner selection, designed money, data and system flows (AED/SAR → USD → local, reusable partner KYC ID, kinship check on our side), negotiated a margin-plus-interbank-FX model, and planned the move from remittance-as-a-service to an in-house build.
- Designed and piloted remittance history as an income signal in credit scoring, so recipients could qualify for loans in the local market.
- Defined the credit-line money flows between BFF and Credit Engine: drawdowns, repayments, balance and minimum-payment calculation, with cached retrieval and refresh triggered by balance-changing events.
- Designed asynchronous full-payoff calculation with invalidation and revalidation before execution, so customers are charged the exact amount owed at payment time.
- Designed asynchronous disbursement flows with callbacks, status checks, idempotency, retries and reconciliation to prevent duplicate or missed money movements, which removed manual payout investigations entirely.
- Launched multi-channel repayments in Malaysia with 2 partners and 3 methods each (cards via PSPs, bank transfers via Virtual IBANs, cash) and the payment event model feeding the Credit Engine.
- Defined integration contracts with PSPs and banks: request/response schemas, transaction identifiers, status transitions, error mapping and validation rules.
- Designed Virtual IBAN issuance within loan origination, including async callbacks, timeouts, retries and duplicate-account closure; 100% of bank-transfer repayments now reconcile automatically.

Technical Product Manager — Payments

Jan 2023 – Jan 2026

inDrive, global ride-hailing and urban services app · Astana, Kazakhstan

- Built the payment orchestration platform end to end, from discovery and solution design through partner integrations, pilot and rollout, scaling from 4 to 40+ countries.

- Designed cost-aware routing based on provider priority, amount, limits, geographic coverage and processing cost, saving ~$100K/month (~20%).
- Designed failover logic using soft/hard decline classification, defining retry eligibility and alternative routing paths.
- Defined unified status and error mapping, aligning external provider responses with one internal transaction state model for consistent, auditable outcomes.
- Designed provider health management (backlogs, timeouts, alerts, support signals), automatic exclusion and gradual traffic restoration, reaching a 96.4% SLA.
- Led PCI DSS Service Provider certification, coordinating Product, Engineering, Security and Compliance.
- Optimized payment flows, growing transaction volume by 1.5%; managed PSP relationships across integrations, incidents and performance reviews.

Lead Product Manager — B2B Fintech & Merchant Products Jun 2020 – Jan 2023

Sbermarket, online grocery marketplace (Jun 2020 – May 2022) → Tinkoff Bank, digital bank (May 2022 – Jan 2023) · Russia

- **Sbermarket:** built financial reconciliation and reporting products for the top 40 retailers, cutting report preparation from 1 day to 1.5 hours; launched a paid analytics subscription MVP (3 of 5 pilots converted to paid) and reduced retailer churn by 15%.
- **Tinkoff:** automated merchant onboarding for internet acquiring, cutting it from 1 month to 2 weeks and support volume by 23%.
- **Tinkoff:** owned the agent channel for internet acquiring: external aggregators resold it for a revenue share plus a fixed bonus on each merchant's first activation; built the agent cabinet, onboarding, reward calculation and payouts; 6 large and many smaller agents brought ~15% of new merchants.
- **Both:** managed a team of 2 product managers and 1 project manager (matrix) through the full cycle: hiring (3 hires after 40+ interviews at Tinkoff), onboarding, growth plans, 1:1 feedback and performance reviews; introduced an OKR-based discovery-to-delivery model and a junior-to-middle mentoring programme.

Product Manager Jan 2019 – Jun 2020

Drom.ru, car classifieds marketplace · Russia

- Designed and launched a CPA monetization model adopted by 90% of wholesale sellers; reduced listing errors from 20% to 4% through automation.

Project Manager 2014 – 2018

Interfaced, custom cross-platform app development

- Ran client projects for 4 long-term clients (including Dom.ru and Odnoklassniki) and several smaller ones, delivering iOS, Android and web apps from one cross-platform codebase.
- Planned and estimated work with the team, kept scope, timelines and budget under control, and handled change requests with clients.
- Owned project documentation (specifications, acceptance criteria, release notes) and releases, including store submissions and post-release fixes.
- Ran the delivery rhythm: sprint planning, status reports and demos for clients, coordination of developers, designers and QA.

SKILLS

Payments: orchestration · routing & failover · PSP/acquirer/EMI/bank integrations · cards · payouts · loan repayments · wallets · Virtual IBANs · reconciliation · settlements · refunds & reversals · provider health management

Platform & integration: API contracts · transaction lifecycle & state models · async integrations · callbacks & webhooks · idempotency · retries · error mapping · monitoring & alerting

Compliance & monetization: PCI DSS (Service Provider) · KYC/AML · antifraud integrations · pricing model launches (CPA, subscriptions)

Ways of working: written specs & async decision-making · cross-functional work with Finance, Security & Compliance · AI-assisted analysis and spec writing · SQL · Grafana · Amplitude · Mixpanel

EDUCATION & LANGUAGES

Tomsk State University — Applied Mathematics and Cybernetics, 2014
