EKATERINA DEYS

Payments Solutions Architect | Integrations & Orchestration

Kazakhstan · Remote or relocation · katedeys@gmail.com · linkedin.com/in/kate-deys · katedeys.github.io/katedeys-portfolio

PROFESSIONAL SUMMARY

Payments solutions architect with 10+ years in tech. I design how money and data move between a platform and its partners: orchestration across 40+ countries, payouts, repayments and remittances, PSP and bank integrations. Product background: I design flows, API contracts and edge cases with engineers rather than write production code. English C1.

SELECTED IMPACT

- **~$100K/month (~20%)** lower processing costs through in-house payment routing · inDrive
- **4 → 40+ countries** on one payment orchestration platform · inDrive
- **96.4%** provider SLA with health monitoring and automatic failover · inDrive
- **+1.5%** transaction volume from payment flow optimisation · inDrive
- **2.5 weeks** steady partner go-live across 4+ PSP, EMI and bank partners · SkyRo
- **100%** of bank-transfer repayments reconciled automatically via Virtual IBANs · SkyRo
- **1 month → 2 weeks** merchant onboarding and **–23%** support volume · Tinkoff
- **~15%** of new merchants brought by an agent channel · Tinkoff
- **1 day → 1.5 hours** report preparation for the top 40 retailers · Sbermarket
- **3 of 5** pilots converted to a paid subscription, **–15%** retailer churn · Sbermarket
- **90%** of wholesale sellers adopted a new CPA model, listing errors **20% → 4%** · Drom.ru

PROFESSIONAL EXPERIENCE

Lead Technical Product Manager — Payments Platform Oct 2025 – Oct 2026

SkyRo, lending fintech · Malaysia (remote) · contract

- Owned solution design for credit disbursements, repayments, wallet operations and external provider integrations, partnering with architects on service boundaries and integration patterns.
- Led solution design for an inbound remittance product (Gulf → Southeast Asia) from zero to MVP, then for its pivot into cross-border credit-line repayments by relatives abroad: partner selection, end-to-end money, data and system flows across app, BFF, KYC, PII vault, credit engine, ledger and billing, AED/SAR → USD → local FX, reuse of the partner's KYC ID plus a kinship check, and a build-vs-buy path (remittance-as-a-service first, in-house build next).
- Designed and piloted remittance history as an income signal in credit scoring, so recipients could qualify for loans in the local market.
- Defined integration contracts between platform services, PSPs and banking partners: request/response schemas, transaction identifiers, status transitions, error mapping and validation rules.
- Designed asynchronous credit disbursement flows with provider callbacks, status polling, idempotency controls, retry policies and reconciliation, which removed manual payout investigations entirely.
- Launched multi-channel loan repayments in Malaysia with 2 partners and 3 methods each (cards via PSPs, bank transfers via Virtual IBANs, cash) and the payment event model between internal systems and the Credit Engine.
- Designed Virtual IBAN issuance within loan origination: bank API requests, async callbacks, timeout handling, status checks, retries and duplicate-account closure; 100% of bank-transfer repayments now reconcile automatically.
- Standardized provider integration patterns across 4+ partners, turning unpredictable integration timelines into a steady 2.5 weeks.

Technical Product Manager — Payments Jan 2023 – Sep 2025

inDrive, global ride-hailing and urban services app · Astana, Kazakhstan

- Built the payment orchestration platform end to end, from discovery and solution design through partner integrations, pilot and rollout, scaling from 4 to 40+ countries.
- Designed transaction-level routing based on provider priority, amount, provider limits, geographic coverage and processing cost, saving ~$100K/month (~20%).
- Designed failover logic using response-code classification (soft vs hard declines), defining retry eligibility and alternative routing paths.
- Defined unified status and error mapping across payment components, aligning external provider responses with the internal transaction state model.
- Designed provider health management based on pending-transaction backlogs, timeouts, alerts and support signals, reaching a 96.4% SLA.

- Designed automatic provider exclusion with gradual traffic restoration after recovery, plus manual traffic-limit controls as a fallback for support teams.
- Led PCI DSS certification as a Service Provider across Product, Engineering, Security and Compliance.
- Optimized payment flows and UX, growing transaction volume by 1.5%; managed PSP relationships across integrations, incidents and performance reviews.

Lead Product Manager May 2022 – Jan 2023
Tinkoff Bank, digital bank · Russia

- Owned the internet acquiring product end to end.
- Automated merchant onboarding, cutting it from 1 month to 2 weeks and reducing support volume by 23%; introduced an OKR-based discovery-to-delivery operating model.
- Owned the agent channel for internet acquiring: external aggregators resold it for a revenue share plus a fixed bonus on each merchant's first activation. Built the agent cabinet, onboarding, reward calculation and payouts, plus merchant onboarding through agents; 6 large and many smaller agents brought ~15% of new merchants, supported by agent training and first-month special terms for their merchants.
- Managed a team of 2 product managers and 1 project manager (matrix) through the full cycle: hiring (3 hires after 40+ interviews), onboarding, growth plans, 1:1 feedback and performance reviews; ran a junior-to-middle mentoring programme.

Lead / Senior Product Manager Jun 2020 – May 2022
Sbermarket, online grocery marketplace · Russia

- Launched a CSI collection and improvement process for retailers on the platform (88% → 94%).
- Created and launched a portal with key performance metrics for Tier-1 and Tier-2 retailers on the platform.
- Designed and launched APIs for retailers with specific pick-up and delivery requirements (drugstores, cosmetics stores, retailers with their own delivery).
- Built financial reconciliation and reporting products for the top 40 retailers, cutting report preparation from 1 day to 1.5 hours; launched an SMB analytics MVP (3 of 5 pilots converted to paid) and reduced retailer churn by 15%.
- Managed a team of 2 product managers and 1 project manager (matrix) through the full cycle: hiring, onboarding, growth plans, 1:1 feedback and performance reviews.

Product Manager Jan 2019 – Jun 2020
Drom.ru, car classifieds marketplace · Russia

- Launched a CPA monetization model adopted by 90% of wholesale sellers; reduced listing errors from 20% to 4% through automation.

Project Manager 2014 – 2018
Interfaced, custom cross-platform app development

- Ran client projects for 4 long-term clients (including Dom.ru and Odnoklassniki) and several smaller ones, delivering iOS, Android and web apps: estimates, scope, timelines and budget, change requests, sprint planning, status reports and client demos.
- Owned project documentation (specifications, acceptance criteria, release notes) and releases, including store submissions, coordinating developers, designers and QA.

TECHNICAL SKILLS

Solution design: API contracts · sequence diagrams · transaction lifecycle & state machines · sync/async integrations · callbacks & webhooks · idempotency · retries & timeouts · error mapping

Payments: orchestration · routing · failover · PSP/acquirer/EMI/bank integrations · cards · payouts · loan repayments · wallets · Virtual IBANs · reconciliation · settlements · refunds & reversals · provider health management

Security & compliance: PCI DSS (Service Provider) · KYC/AML · antifraud integrations

Tools: SQL · Grafana · Amplitude · Mixpanel

EDUCATION & LANGUAGES

Tomsk State University — Applied Mathematics and Cybernetics, 2014

English — C1
