EKATERINA DEYS

Product Manager | Discovery & Fintech Platforms

Kazakhstan · Remote or relocation · katedeys@gmail.com · linkedin.com/in/kate-deys · katedeys.github.io/katedeys-portfolio

PROFESSIONAL SUMMARY

Product manager with 10+ years in tech who turns client needs into working systems: payment platforms across 40+ countries, partner integrations live in 2.5 weeks, B2B products for retailers and merchants. I lead discovery with clients and translate it into clear requirements for engineers. English C1.

SELECTED IMPACT

- **~$100K/month (~20%)** lower processing costs through in-house payment routing · inDrive
- **4 → 40+ countries** on one payment orchestration platform · inDrive
- **96.4%** provider SLA with health monitoring and automatic failover · inDrive
- **+1.5%** transaction volume from payment flow optimisation · inDrive
- **2.5 weeks** steady partner go-live across 4+ PSP, EMI and bank partners · SkyRo
- **100%** of bank-transfer repayments reconciled automatically via Virtual IBANs · SkyRo
- **1 month → 2 weeks** merchant onboarding and **–23%** support volume · Tinkoff
- **~15%** of new merchants brought by an agent channel · Tinkoff
- **1 day → 1.5 hours** report preparation for the top 40 retailers · Sbermarket
- **3 of 5** pilots converted to a paid subscription, **–15%** retailer churn · Sbermarket
- **90%** of wholesale sellers adopted a new CPA model, listing errors **20% → 4%** · Drom.ru

PROFESSIONAL EXPERIENCE

Lead Technical Product Manager — Payments Platform

Oct 2025 – Oct 2026

SkyRo, lending fintech · Malaysia (remote, lending fintech) · contract

- Translated business requirements for credit products into functional designs for disbursements, repayments and wallet operations: flows, statuses, transitions, validation and error rules; asynchronous payouts removed manual payout investigations entirely.
- Took an inbound remittance product (Gulf → Southeast Asia) from zero to MVP and pivoted it into cross-border repayments, where relatives abroad top up a family member's credit line: researched and selected partners, mapped money, data and system flows, agreed the commercial model with the partner, and planned the move from a remittance-as-a-service provider to an in-house build.
- Launched multi-channel loan repayments in Malaysia with 2 partners and 3 methods each (cards, bank transfers via Virtual IBANs, cash), including customer-facing confirmation steps and edge cases such as expired or changed payoff amounts.
- Wrote specifications and acceptance criteria for asynchronous processes (callbacks, timeouts, retries), working through edge cases with architects and engineers before development.
- Ran requirement sessions with external PSPs, EMIs and banks and standardized the resulting integration specs, turning unpredictable integration timelines into a steady 2.5 weeks per partner.

Technical Product Manager — Payments

Jan 2023 – Sep 2025

inDrive, global ride-hailing and urban services app · Astana, Kazakhstan (ride-hailing, 40 countries)

- Led the payment orchestration product from discovery through functional design, requirements, partner integrations, pilot and full launch across 40 countries.
- Defined routing and failover behaviour (provider priorities, limits, geography, cost, decline types), balancing business savings against user success rate and technical constraints; saved ~$100K/month.
- Designed status and error models across payment components so users, support and finance see consistent outcomes.
- Defined provider health monitoring and manual controls for support teams, reaching a 96.4% SLA.
- Improved payment UX, increasing transaction volume by 1.5%; managed external PSP relationships across integrations, incidents and performance reviews.
- Led PCI DSS Service Provider certification, aligning Product, Engineering, Security and Compliance.

Lead Product Manager

May 2022 – Jan 2023

Tinkoff Bank, digital bank · Russia

- Owned the internet acquiring product end to end.
- Redesigned and automated merchant onboarding, cutting it from 1 month to 2 weeks and reducing support volume by 23%.

- Owned the agent channel for internet acquiring: external aggregators resold it for a revenue share plus a fixed bonus on each merchant's first activation. Built the agent cabinet, onboarding, reward calculation and payouts, plus merchant onboarding through agents; 6 large and many smaller agents brought ~15% of new merchants, supported by agent training and first-month special terms for their merchants.
- Managed a team of 2 product managers and 1 project manager (matrix) through the full cycle: hiring (3 hires after 40+ interviews), onboarding, growth plans, 1:1 feedback and performance reviews; ran a junior-to-middle mentoring programme.
- Introduced an OKR-based discovery-to-delivery operating model for the team.

Lead / Senior Product Manager Jun 2020 – May 2022

Sbermarket, online grocery marketplace · Russia

- Launched a CSI collection and improvement process for retailers on the platform (88% → 94%).
- Created and launched a portal with key performance metrics for Tier-1 and Tier-2 retailers on the platform.
- Designed and launched APIs for retailers with specific pick-up and delivery requirements (drugstores, cosmetics stores, retailers with their own delivery).
- Ran discovery with the top 40 retail partners and delivered retailer dashboard and financial reconciliation MVPs; customer satisfaction rose from 65% to 85% through structured feedback loops.
- Launched an SMB analytics MVP through customer pilots, converting 3 of 5 retailers to paid subscriptions; reduced retailer churn by 15%.
- Cut financial-report preparation for retailers from one day to 1.5 hours.
- Managed a team of 2 product managers and 1 project manager (matrix) through the full cycle: hiring, onboarding, growth plans, 1:1 feedback and performance reviews.

Product Manager Jan 2019 – Jun 2020

Drom.ru, car classifieds marketplace · Russia (automotive marketplace)

- Launched a CPA monetization model adopted by 90% of wholesale sellers; reduced listing errors from 20% to 4% and support resolution time from two days to three hours through automation.

Project Manager 2014 – 2018

Interfaced, custom cross-platform app development

- Ran client projects for 4 long-term clients (including Dom.ru and Odnoklassniki) and several smaller ones, delivering iOS, Android and web apps from one cross-platform codebase.
- Planned and estimated work with the team, kept scope, timelines and budget under control, and handled change requests with clients.
- Owned project documentation (specifications, acceptance criteria, release notes) and releases, including store submissions and post-release fixes.
- Ran the delivery rhythm: sprint planning, status reports and demos for clients, coordination of developers, designers and QA.

SKILLS

Discovery & strategy: stakeholder and partner discovery · B2B customer interviews and pilots · roadmapping · prioritization · OKRs

Functional design: product specifications · user stories & acceptance criteria · user and process flows · state models · edge cases & error handling · API and integration requirements

Validation & analytics: product analytics · customer feedback loops · pilot evaluation · SQL · Amplitude · Mixpanel · Grafana

Domains: payments · lending · banking · e-commerce · marketplaces · PCI DSS · KYC/AML

EDUCATION & LANGUAGES

Tomsk State University — Applied Mathematics and Cybernetics, 2014

English — C1
